

ALZHEIMER'S

We are teaming up with Alzheimer's Association, Pharmaceutical companies, and major Universities to help educate researchers, project managers, clinical leaders, patients, and caregivers about the benefits of including in-home trial support in clinical trials. This service **reduces the burden of participation** on patients and caregivers and ensures **complete data** for researchers.

THE NUMBERS

APPROXIMATELY 47 MILLION PEOPLE WORLDWIDE, HAVE DEMENTIA WITH 99 MILLION NEW CASES EACH YEAR ALZHEIMER'S ACCOUNTS FOR

60-70% OF ALL THE DEMENTIA CASES

MORE THAN **5.5 MILLION** AMERICANS ARE LIVING WITH ALZHEIMER'S

ALZHEIMER'S DISEASE IS THE 6TH LEADING CAUSE OF DEATH IN THE UNITED STATES

IN 2016 **MORE THAN 15 MILLION** AMERICANS PROVIDED AN ESTIMATED **18.2 BILLION HOURS** OF UNPAID CARE FOR THOSE WITH ALZHEIMER'S OR OTHER DEMENTIAS, VALUED **AT MORE THAN \$230 BILLION**

THE MRN

MRN has seen a **99%** retention rate for patients using Home Trial Support

MRN HAS SUPPORTED **OVER 800 NEUROLOGY PATIENTS** AND HAS PERFORMED **OVER 600 IN-HOME VISITS** FOR ALZHEIMER'S PATIENTS PARTICIPATING IN **CLINICAL TRIALS**

It is often difficult to enroll **Alzheimer's patients in clinical trials**. One barrier is the need for a study partner. To understand daily changes in cognitive behavior a study partner is required, with responsibility usually falling to the spouse, increasing the burden of participation in a **clinical trial**.

The Home Trial Support service works to the benefit of patients and their families
